About me

I'm an enthusiastic software developer and Computer Science student. I began my journey in 2019 with robotics, and since then, my focus has been on tackling challenges, creating efficient and scalable solutions.
With a solid background built on personal projects, I'm dedicated consistently to applying and enhancing my skills, as well as contributing to innovative initiatives.

Professional Experience

Full Stack Development Intern

Exati Tecnologia
Sep/2024 - Present
Development of web applications using JavaScript and Java, with support in the analysis and updating of databases. Assistance in quality testing and software approval, contributing to the maintenance and improvement of existing technological solutions.
